

Estimated time needed: **10 minutes**

Objective for Exercise:

- Share your notebook from Watson Studio

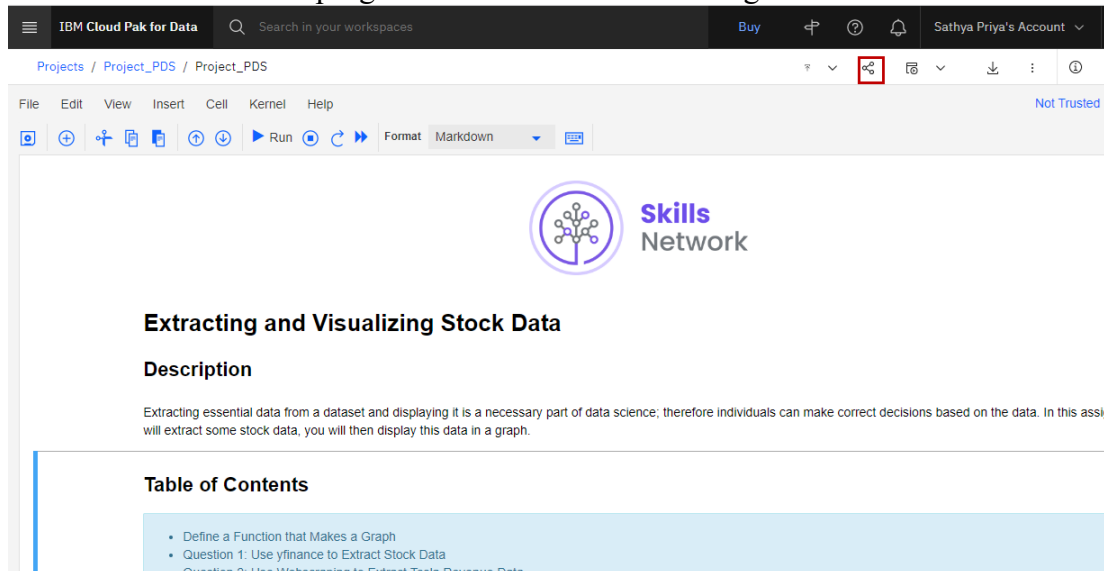

Step 1: Share your notebook from Watson Studio:

Once you complete your notebook you will have to save and share it to be marked.

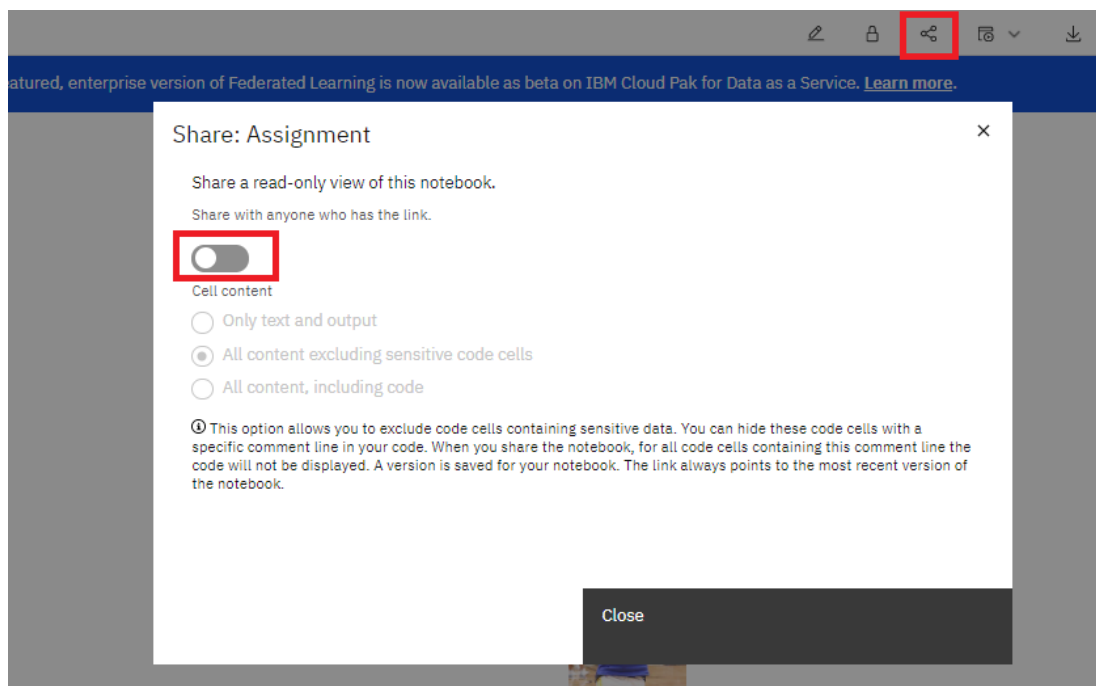

To save the notebook, click on the save icon on the top left.

The screenshot displays the IBM Cloud Pak for Data interface. At the top, there is a navigation bar with the text 'IBM Cloud Pak for Data' and a search bar. Below this, the breadcrumb 'Projects / Project_PDS / Project_PDS' is visible. The main content area shows a notebook titled 'Extracting and Visualizing Stock Data'. The notebook has a description: 'Extracting essential data from a dataset and displaying it is a necessary part of data science; therefore individuals can make correct decisions based on the data. In this assign will extract some stock data, you will then display this data in a graph.' Below the description is a 'Table of Contents' section with a list of items: 'Define a Function that Makes a Graph', 'Question 1: Use yfinance to Extract Stock Data', and 'Question 2: Use Web scraping to Extract Tesla Revenue Data'. The interface also includes a menu bar with options like File, Edit, View, Insert, Cell, Kernel, and Help, and a toolbar with various icons for saving, running, and formatting.

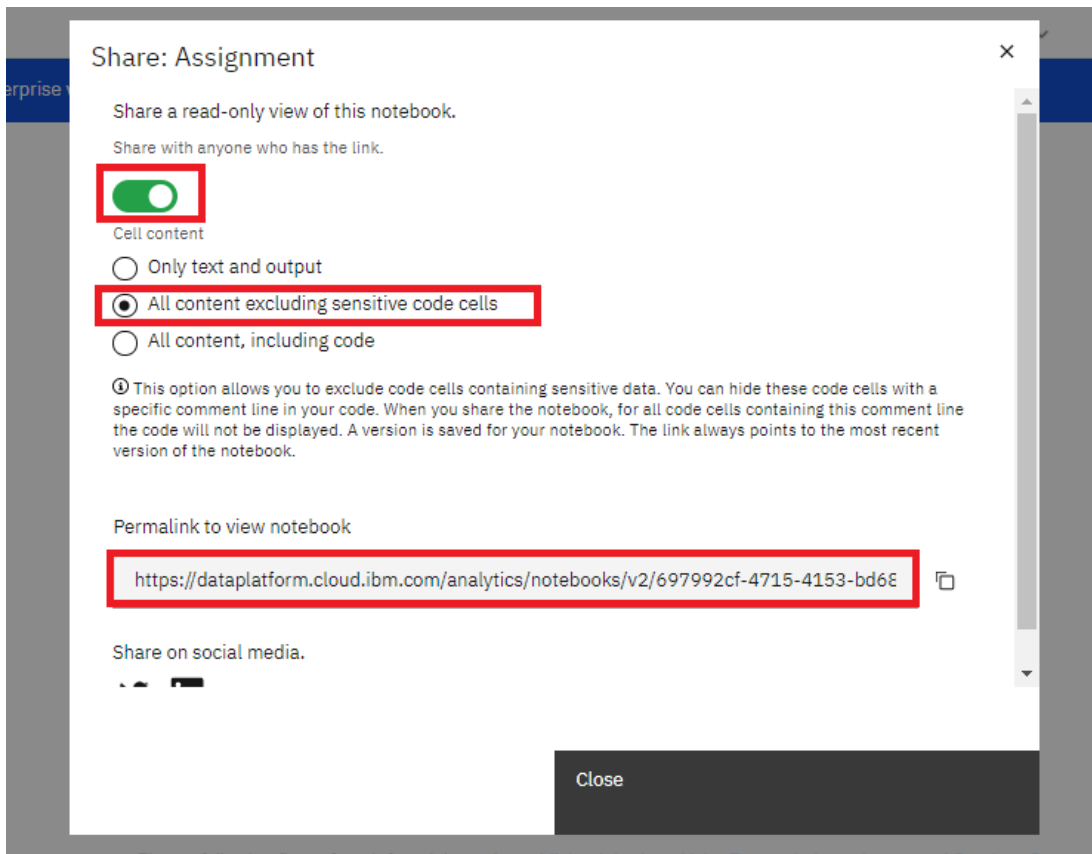

Select the icon on the top right a marked in red in the image below.

A dialogue box should open, enable the option marked in red in the image below.

Once the option is enabled select the option all content excluding sensitive code cells and you can then share the notebook by copying the URL in the **Permanent link to view notebook**, as shown in the following image:

Paste the URL in a new browser window and check if the notebook is rendered as intended before sharing it for review with your peers.
